

Dynamic Placement Test

No more marking
No more paper

Run **your** test on **their** devices

The online Dynamic Placement Test enables you to sort your students into CEFR bands quickly, easily, economically — and above all, accurately.

- 1 You decide the test time, place, and who will do it.
- 2 The system emails test takers. They download an app.
- 3 At the time you chose, the test begins on their devices.
- 4 Results appear automatically in the Admin Panel.

There is no marking for teachers to do, and because the test is online you can even run it pre-arrival.

New question types

Question types include listening and reading, as well as sentence-level items. Sentence reconstruction and word placement take a holistic look at candidates' English by testing vocabulary, collocations, grammatical structures and syntax. They offer more complexity than traditional multiple choice items, particularly at the higher levels, and candidates have to interact more closely with the sentences.

01 Drag the word to the correct place in the sentence.
I've told you a time how important this letter is to me.
many

01 Drag each word left or right to make a sentence.
Small me is this for too shirt .

Tests learners from CEFR A1 to C2.

B1

01 Drag the ☰ icons up or down to make a short conversation.

No problem at all. Just go to the cashier and he'll refund it to your credit card. ☰

I'd prefer to get my money back. ☰

Good morning, sir. How can I help you? ☰

Would you like to exchange it for a new one or get a refund? ☰

Thank you very much. ☰

Well, I bought this pen here two days ago. But it's not working properly. ☰

A new approach to placement testing

It's **convenient** and **time-saving**. You can set up a test in 5 minutes.

It runs on **desktops, tablets** and **smartphones**. No need for expensive hardware.

It's **accurate**, designed by test experts **telc** to international standards.

It's **affordable**, enabling you to run high quality tests within a tight budget.

Try it...
